**Test Report No. BPE 306557/1**  
**Issue Date: 25 August 2022**

Attn: Lilly Chen

The following sample was submitted and identified by the client as:

**Sample Name:** Stadium Seat  
**Sample Description:** YOUREASE YY-QY-P by Superware  
**Sample Reference:** YY-QY-P  
**Date of Receipt:** 08<sup>th</sup> June 2022  
**Testing Period:** Testing conducted between 09<sup>th</sup> June 2022 and 16<sup>th</sup> August 2022  
(Please note that this testing was conducted at another laboratory within the SGS group of companies)  
**Test Method and Results:** See appendix

#### Test Result Summary

| No.                                                        | Test(s) Requested | Result(s) | Comments |
|------------------------------------------------------------|-------------------|-----------|----------|
| 1                                                          | ISO 9227:2017     | Grade 8   | /        |

## Appendix

### Test Result:

#### Test Conducted:

ISO 9227:2017 Corrosion Tests in Artificial Atmospheres — Salt Spray Tests.

#### No. of Sample:

1 piece (Sample #1). For more sample information and pictures, please refer to the following page.

| 1. General Information:                                                                                                                                                                                                                                                                            |                           |                       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-----------------------|
| Test Method: Neutral Salt Spray<br>- Concentration of NaCl Solution: 50 g/l $\pm$ 5 g/l<br>- pH of Salt Solution: 6.5~7.2<br>- Measure of the salt fog fall: $(1.5 \pm 0.5)\text{ml}/(80\text{cm}^2\cdot\text{h})$<br>- Test Duration: 240 hours<br>- Test Temperature: $(35 \pm 2)^\circ\text{C}$ |                           |                       |
| 2. Observation Rating (Evaluating based on ISO 10289:1999)                                                                                                                                                                                                                                         |                           |                       |
| 1. The observation rating is based on ISO 10289:1999 which is just method standard. Pass and Fail criteria will depend on buyer's acceptable specifications.<br>2. The observation rating is based on the 11-step scale of 0 to 10, where 0 is bad and 10 is good.                                 | Rating ( $R_P$ or $R_A$ ) | Area of defects A (%) |
|                                                                                                                                                                                                                                                                                                    | 10                        | No defects            |
|                                                                                                                                                                                                                                                                                                    | 9                         | $0 < A \leq 0.1$      |
|                                                                                                                                                                                                                                                                                                    | 8                         | $0.1 < A \leq 0.25$   |
|                                                                                                                                                                                                                                                                                                    | 7                         | $0.25 < A \leq 0.5$   |
|                                                                                                                                                                                                                                                                                                    | 6                         | $0.5 < A \leq 1.0$    |
|                                                                                                                                                                                                                                                                                                    | 5                         | $1.0 < A \leq 2.5$    |
|                                                                                                                                                                                                                                                                                                    | 4                         | $2.5 < A \leq 5.0$    |
